# INDEX OF AUTHORS — VOLUME 16

A

Allen, T. D. *See* Schor, Schor and Allen 677
Altner, H. *See* Haug and Altner 377
Arsenault, A. L., Castell, J. D. and Ottensmeyer, F. P. The dynamics of exoskeletal-epidermal structure during molt in juvenile lobster by electron microscopy and electron spectroscopic imaging 93

B

Beadle, D. J. *See* Booth, Beadle and Hart 589
Beams, H. W. *See* Kessel and Beams 405
Bols, N. C. *See* Stanley, Kasinsky and Bols 203
Booth, T. F., Beadle, D. J. and Hart, R. J Ultrastructure of the accessory glands of Gene's organ in the cattle tick, *Boophilus* 589
Bossen, E. H. and Sommer, J. R. Comparative stereology of the lizard and frog myocardium 173
Bouchaud, C. *See* Tauc, Vignon and Bouchaud 65
Bouligand, Y. *See* Duvert, Bouligand and Salat 469
Brac, T. The charge distribution in the rough endoplasmic reticulum/Golgi complex transitional area investigated by microinjection of charged tracers 859
Bradley, T. J. *See* Levinson and Bradley 367
Braunbeck, T. and Dales, R. P The role of the heart-body and of the extravasal tissue in disposal of foreign cells in two polychaete annelids 557
Brett, J. G. and Godman G. C. Macrovacuolation induced by cytochalasin: its relation to the cytoskeleton; morphological and cytochemical observations 311
— —, Membrane cycling and macrovacuolation under the influence of cytochalasin: kinetic and morphometric studies 325
Brigham, K. L. and Meyrick, B. Granulocyte-dependent injury of pulmonary endothelium: a case of miscommunication? 137
— — and Ryan, U. S. Trypsin-induced aggregation of bovine pulmonary artery endothelial cells cultured on microcarriers 167
—, *See* Meyrick, Hoffman and Brigham 1
Butler, R. D. *See* Gabri and Butler 627
Butterworth, F. M and Forrest, E. C. Ultrastructure of the preparative phase of cell death in the larval fat body of *Drosophila melanogaster* 237

C

Campbell, I. C. *See* Filshie and Campbell 789
Carstens, P. H. B. *See* de Gee, Carstens, McCann and Mansfield 731
Carter, M. A. *See* Larkman and Carter 125
Castell, J. D. *See* Arsenault, Castell and Ottensmeyer 93
Caveney, S. *See* Williams. Shivers and Caveney 411
Chambon, Y. *See* Lescoat, Saboureau, Segalen and Chambon 195
Cho, M.-I. *See* Garant, Nagy and Cho 635
Crawford, B. J. and Crawford, T. J. Type, location and role of glycosaminoglycans in cloned differentiated chick retinal pigmented epithelium 885
Crawford, T. J. *See* Crawford and Crawford 885

D

Dales, R. P. *See* Braunbeck and Dales 557
Davis, W. L. and Jones, R. G. Peroxisomes in the absorptive cells of normal, rachitic and vitamin-D replete chick intestine: ultrastructure and histochemistry 443
de Gee, A. L. W., Carstens, P. H. B., McCann, P. P. and Mansfield, J. M. Morphological changes in *Trypanosoma brucei rhodesiense* following inhibition of polyamine biosynthesis *in vivo* 731
Denefle, J.-P. and Lechaire, J.-P. Epithelial locomotion and differentiation in frog skin cultures 499
Dodson, R. F. *See* Ford, Dodson and Williams 53
Dougherty, W. J. and Sandifer, P. A. Relationships between germinal cells and sustentacular cells in the testes of a palaemonid shrimp 115
Downs, T. R. *see* Wilfinger, Larsen, Downs and Wilbur 483
Duncan, G. *See* Willekens, Vrensen, Jacob and Duncan 941
Duvert, M., Bouligand, Y. and Salat, C. The liquid crystalline nature of the cytoskeleton in epidermal cells of the chaetognath *Sagitta* 469

E

Essner, E. and Gordon, S. R. Demonstration of microfibrils in Bruch's membrane of the eye 779

F

Farley. R. D. The ultrastructure of hemocytopoietic organs in the desert scorpion, *Paruroctonus* 577
Fawcett, D., Musoke, A. and Voigt, W. Interaction of sporozoites of *Theileria parva* with bovine lymphocytes *in vitro*. I. Early events after invasion 873
Filshie, B. K. and Campbell, I. C. Design of an insect cuticle associated with osmoregulation: the porous plates of chloride cells in a mayfly nymph 789
Ford, J. O., Dodson, R. F. and Williams, M. G. Jr. An ultrastructural study of the blood/air barrier in the guinea pig 53

Forrest, E. C. *See* Butterworth and Forrest 237
Franzini-Armstrong, C. Freeze-fracture of frog slow tonic fibers. Structure of surface and internal membranes 647
Franzl, S., Locke, M. and Huie, P. Lenticles: innervated secretory structures that are expressed at every other larval moult 251
Frøkjaer-Jensen, J. The plasmalemmal vesicular system in striated muscle capillaries and in pericytes 31

G

Gabri, M. S. and Butler, R. D. The ultrastructure of the renal corpuscle of a lizard 627
Gail, D. *See* Ryan, Slavkin, Revel, Massaro and Gail 829
Garant, P. R., Nagy, A. R. and Cho, M.-I. A freeze-fracture study of the papillary layer of the rat incisor enamel organ 635
Geraudie, J. and Meunier, F. J. Structure and comparative morphology of camptotrichia of lungfish fins 217
Giraud-Guille, M.-M. Fine structure of the chitin-protein system in the crab cuticle 75
Godman, G. C. *See* Brett and Godman 311
—, *See* Brett and Godman 325
Gordon, R. E. and Lane, B. P. Immunolocalization of myosin and tropomyosin in cells undergoing ciliogenesis during regeneration of rat tracheal epithelium 337
Gordon, S. R. *See* Essner and Gordon 779
Graf, F. *See* Meyran, Graf and Nicaise 269
Greenwood, P. G. and Mariscal, R. N. The utilization of cnidarian nematocysts by aeolid nudibanchs: nematocyst maintenance and release in *Spurilla* 719

H

Hamlett, W. C. and Wourms, J. P. Ultrastructure of the pre-implantation shark yolk sac placenta 613
Harrison, J. B. *see* Morris and Harrison 601
Hart, R. J. *See* Booth, Beadle and Hart 589
Haug, T. and Altner, H. A cryofixation study of presumptive hygroreceptors on the antennule of a terrestrial isopod 377
Hinsch, G. W. *See* Vermeire and Hinsch 107
Hoffman, L. H. *See* Meyrick, Hoffman and Brigham 1
Högner, D., Telling, A., Lepper, K. and Jost, E. Patterns of nuclear lamins in diverse animal and plant cells and in germ cells as revealed by immunofluorescence microscopy with polyconal and monoclonal antibodies 693
Holley, M. C. The ciliary basal apparatus is adapted to the structure and mechanics of the epithelium 287
Huie, P. *See* Franzl, Locke and Huie 251

# INDEX OF SUBJECTS VOLUME 16

A

Absorptive cells of chick intestine, peroxisomes in 443
Accessory glands, of Gene's organ in the cattle tick, *Boophilus*, ultrastructure of 589
Actin, -containing structures, a method for staining 43
—, macrovacuolation induced by cytochalasin: its relation to the cytoskeleton 311
*Actinia*, sea anemone, oogenesis in 393
Annelid, serpulid, photoreceptors of 951
—s, polychaete, the role of heart-body and of the extravasal tissue in disposal of foreign cells in 557
Antibodies, polyclonal, nuclear lamins revealed by 693
Autophagosomes, in larval fat body of *Drosophila* 237

B

Basal apparatus, ciliary, is adapted to the structure and mechanics of the epithelium 287
Basal lamina, demonstration of microfibrils in Bruch's membrane of the eye 779
— —, formation of in differentiating insect tissues 909
— —, insect, removal of using elastase 367
Blood/air barrier, in the guinea pig, an ultrastructural study of 53
Blood cells, chemotaxis of granulocytes 1
Blood/CSF barrier, in fetal rat choroid plexus, evidence for effectiveness of: freeze-fracture and peroxidase diffusion study 65
Bone, in camptotrichia of lungfish fins 217
*Buccinum*, whelk, periostracum of 565

C

Calcium, pathway, through a mineralizing epithelium in the crustacean *Orchestia* in pre-molt 269
—, absorption, in normal, rachitic and vitamin-D replete chick intestine 443
—, transport, and shell formation in the barnacle *Chthamalus* 433
Camptotrichia, of lungfish fins, structure and comparative morphology of 217
Capillaries, of striated muscle 31
Cationic markers, surface coats of pore tubules and olfactory sensory dendrites of a silkmoth revealed by 705
Cell, death, preparative phase of, in larval fat body of *Drosophila* 237
—, -to-cell interactions of the developing lung 829
— junctions, in crayfish hepatopancreatocytes 917
— —, in epidermal cells of the chaetognath *Sagitta* 469
— —, of papillary layer of the rat incisor enamel organ 635
Chaetognath, *Sagitta*, the liquid crystalline nature of the cytoskeleton in epidermal cells of 469
Chemotaxis, of granulocytes across bovine pulmonary artery intimal explants without endothelial injury 1
*Chironomus*, developing flight muscle of 767
Chitin, -protein system in cuticle of crab, fine structure of 75
— helicoids, in the periostracum of a whelk 565
Chloragogen cells, in polychaete annelids 557
Chloride cells, porous plates, in a mayfly nymph: design of an insect cuticle associated with osmoregulation 789
Cholesteric organization, of the cytoskeleton in epidermal cells of the chaetognath *Sagitta* 469
—, of DNA in the stallion sperm head 535
Choroid plexus, rat fetal, blood/CSF barrier in 65
Chromatin diminution, meiotic, in a vertebrate, the holocephalan fish *Hydrolagus colliei* 203
Cilia, basal apparatus of, and mechanics of epithelium 287
—, of hedgehog uteri 195
Ciliogenesis, immunolocalization of myosin and tropomyosin in cells undergoing 337
Cilium-stereociliary complex, of perioral sensory cells in *Hydra*, HVEM of 345
Circulatory system, aggregation of bovine pulmonary artery endothelial cells cultured on 167
— —, blood/CSF barrier in fetal rat choroid plexus 65
— —, chemotaxis of granulocytes across bovine pulmonary artery intimal explants 1
— —, comparative stereology of the lizard and frog myocardium 173
— —, plasmalemmal vesicular system in striated muscle capillaries and in pericytes 31
— —, the blood/air barrier in guinea pig 53
Cnidarian, *Spurilla*, nematocyst maintenance and release in 719
Coelomocytes, in polychaete annelids 557
Colenterate, apparent absence of cortical reaction in a sea anemone 125
—, *Chlorohydra*, freeze-fracture study of phagocytosis by digestive cells of 519
—, sea anemone, *Actinia*, oogenesis in 393
—, —, fertilization in 125
Collagen, in camptotrichia of lungfish fins 217
Cortical reaction, apparent absence of, after fertilization in a sea anemone 125
Cryofixation, of presumptive hygroreceptors on the antennule of a terrestrial isopod 377
Crustacea, *Chthamalus*, shell formation and calcium transport in 433
—, crab, fine structure of chitin-protein system in cuticle of 75

—, crayfish, hepatopancreas of a 805
—, crayfish, crustecdysone-induced modulation of electrical coupling and gap junction structure in hepatopancreatocytes in 917
—, lobster, dynamics of exoskeletal-epidermal structure during molt in 93
—, *Orchestia*, calcium pathway through a mineralizing epithelium in 269
—, palaemonid shrimp, relationships between germinal cells and sustencular cells in testes of 115
—, terrestrial isopod, presumptive hygroreceptors on the antennule of 377
Crustecdysone-induced modulation, of electrical coupling and gap junction structure in crayfish hepatopancreatocytes 917
Cuticle, of olfactory sensilla, in silkmoth 131
—, of crab, chitin-protein system in 75
—, lobster, dynamics of exoskeletal-epidermal structure during molt in 93
—, insect, design of, associated with osmoregulation: porous plates of chloride cells in a mayfly nymph 789
—, of the nematode *Trichinella* 819
Cytochalasin, macrovacuolation induced by, its relation to the cytoskeleton; morphological and cytoskeletal observations 311
—, membrane, cycling and macrovacuolation under the influence of 325
Cytoskeleton, a method for staining actin-containing structures in thick plastic sections for medium voltage electron microscopy 43
—, liquid crystalline nature of, in the epidermal cells of the chaetognath *Sagitta* 469
—, macrovacuolation induced by cytochalasin: its relation to the 311

D

DNA, in sperm head, cholesteric organization of 535
Droplets, cytoplasmic of boar sperm 455
*Drosophila melanogaster*, preparative phase of cell death in the larval fat body of 237

E

Egg wax, in the cattle tick, *Boophilus* 589
Elastase, removal of insect basal laminae using 367
Elastin, in Bruch's membrane of the eye 779
Electrical coupling, and gap junction structure, crustecdysone-induced modulation of 917
Electron spectroscopic imaging, exoskeletal-epidermal structure during molt in juvenile lobster, studied by 93
Enamel organ, incisor, freeze-fracture study of the papillary layer of 635
Endocrine system, an *in vitro* model for studies of intercellular communication in cultured rat anterior pituitary cells 483
Endocytosis, mechanisms of nutritive. III. A freeze-fracture study of phagocytosis by digestive cells of *Chlorohydra* 519
—, of sporozoites of *Theileria parva* by bovine lymphocytes *in vitro* 873
Endometrium, hedgehog, SEM study of 195
Endoplasmic reticulum, a new function for—the induction and distribution of an insect ferritin 739
— —/Golgi complex transitional area, charge distribution in, investigated by microinjection of charged tracers 859
Endothelial cells, bovine in culture synthesis of subendothelial matrix by 677
Endothelium, pulmonary, granulocyte dependent injury of 137
Epidermal growth factor, effect of, on cultured adult rat hepatocytes 157
Epididymis, cytoplasmic droplets of boar sperm in 455
Epithelium, cloned differentiated chick retinal pigmented 885
—, mineralizing, calcium pathway through 269
—, rat tracheal, regeneration of 337
Erythrocyte, identification and functions of transmembrane glycoproteins in 665
Exoskeleton, of crab, chitin-protein system in 75
Exoskeletal, -epidermal structure, dynamics of, during molt in juvenile lobster, by electron microscopy and electron spectroscopic imaging 93
Extravasal tissue, role of, in polychaete annelids 557
Eye, clonal culture, of chick retina pigmented epithelium 885
—, demonstration of microfibrils in Bruch's membrane of the 779
—, embryonic chick retina, isolation and characterization of flat cells, a subpopulation of 843
—, novel organelle associations in photoreceptors of a serpulid worm 951
—, the ultrastructure of the lens of the cephalopod *Sepiola*: an SEM study 941

F

Fat body, larval of *Drosophila*, ultrastructure of the preparative phase of cell death in 237
Ferritin, charged, rough ER/Golgi complex transitional area investigated by microinjection of 859
—, the induction and distribution of, in an insect—a new function for the endoplasmic reticulum 739
Fertilization, in a sea anemone, apparent absence of a cortical reaction after 125
Filament, -directed intercellular contacts during differentiation of cultured chick myoblasts 17
—s, intramitochondrial, and intracisternal tubules in a snail 405
Fish, elasmobranch, ultrastructure of the preimplantation shark yolk sac placenta 613
—, holocephalan, meiotic chromatin diminution in 203
—, structure and comparative morphology of camptotrichia of 217
Flat cells, isolation and characterisation of, in embryonic chick retina 843
Freeze-fracture, and peroxidase diffusion study of blood/CSF barrier in fetal rat choroid plexus 65
— —, cell junctions in crayfish hepatopancreatocytes 917

— —, cell-to-cell interactions in the developing lung 829
— —, identification and function of transmembrane glycoproteins—the red cell model 665
— —, of cultured rat anterior pituitary cells 483
— —, of frog slow tonic fibers. Structure of surface and internal membranes 647
— —, study of papillary layer of the rat incisor enamel organ 635
— —, study of phagocytosis by digestive cells of *Chlorohydra* 519
— —, study of the surface of the infective stage larva of the nematode *Trichinella* 819

G

Gene's organ, in the cattle tick 589
Germ cells, nuclear lamins in 693
Glial cells, in embryonic chick retina 843
Glycoproteins, transmembrane, identification and function of 665
Glycosaminoglycans, type, location and role of, in cloned differentiated chick retinal pigmented epithelium 885
Golgi complex/rough ER transitional area, the charge distribution in, investigated by microinjection of charged tracers 859
Granulocyte, -dependent injury of pulmonary endothelium 137
—s, chemotaxis of, across bovine pulmonary artery intimal explants 1
Growth factor, epidermal, effect of, on rat hepatocytes 157

H

Heart-body, and extravasal tissue, role of in disposal of foreign cells in polychaete annelids 557
Hemocytopoietic organs, ultrastructure of, in the desert scorpion, *Paruroctonus* 577
Hepatocytes, adult rat, effect of epidermal growth factor on cultured 157
Hepatopancreas, of a crayfish, metal-containing inclusions of mature cell types in 805
Holocephalan fish, *Hydrolagus colliei*, meiotic chromatin diminution in 203
HVEM, of the cilium-stereociliary complex of the perioral sensory cells in *Hydra* 345
*Hydra*, feeding behavior, perioral synaptic connections and their role in 355
—, HVEM of the cilium-stereociliary complex of perioral sensory cells in 345
*Hydrolagus*, holocephalan fish, meiotic diminution in 203
Hygroreceptors, presumptive, on the antennule of a terrestrial isopod, a cryofixation study of 377

I

Imaginal disc, basal laminae, removal of using elastase 367
Immunolocalization, of myosin and tropomyosin, during regeneration of rat tracheal epithelium 337
Insect, basal laminae, removal of, using elastase 367
—, ferritin, the induction and distribution of 739
—, lenticles of larvae 251
—, metamorphosis, active muscle migration during 411
—, preparative phase of cell death in the larval fat body of *Drosophila* 237
—, silkmoth, olfactory sensilla of 131
—, —, sensory dendrites of 705
—, Strepsiptera, atypical "fibrillar" flight muscle in 929
—, tobacco hornworm, *Manduca*, CNS features of a nicotine-resistant 601
—, tissues, lamellar bodies in differentiating, during basal lamina formation 909
Intercellular contacts, filament-directed, during differentiation of cultured chick myoblasts 17
Intermediate filaments, vimentin-based 311

K

Keratin, in frog skin cultures 499
Kidney, ultrastructure of the renal corpuscle of a lizard 627

L

Lamellar bodies, in differentiating insect tissues during basal lamina formation as revealed by tannic acid 909
*Lamina densa*, differentiation of, in frog skin cultures 499
Lamins, nuclear, patterns of, in diverse animal and plant cells and in germ cells as revealed by immunofluorescence microscopy with polyconal and monoclonal antibodies 693
Lens, of the cephalopod *Sepiola*, ultrastructure of: SEM study 941
Lenticles, innervated secretory structures that are expressed at every other larval moult 251
*Limnaea*, snail, intracisternal tubules and intramitochondrial filaments in cells of 405
Liquid crystal, model of the cytoskeleton in epidermal cells of the chaetognath *Sagitta* 469
— —, organization of DNA in the stallion sperm head 535
Lizard, ultrastructure of the renal corpuscle of 627
Lung, an ultrastructural study of the blood/air barrier 53
—, developing, cell-to-cell interactions in 829
Lymphocytes, bovine, interaction of sporozoites of *Theileria parva* with 873
Lysosome, evasion, in interaction of *Theileria* with bovine lymphocytes 873

M

Macrovacuolation, induced by cytochalasin; its relation to the cytoskeleton; morphological and cytochemical observations 311
—, membrane cycling and, under the influence of cytochalasin: kinetic and morphometric studies 325
Malpighian tubule, removal of basal laminae of, using elastase 367

Mantle, in the barnacle *Chthamalus* 433
Membrane, cycling, and macrovacuolation under the influence of cytochalasin: kinetic and morphometric studies 325
—, junctions, in cultured rat anterior pituitary cells 483
—s, surface and internal, freeze-fracture of, in frog slow tonic fibers 647
Mesangium, of lizard kidney 627
Metal-containing inclusions, of mature cell types of the hepatopancreas of a crayfish 805
Microcarriers, aggregation of endothelial cells cultured on 167
Microfibrils, demonstration of, in Bruch's membrane of the eye 779
Microfilaments, actin-containing, a method for staining, in thick plastic sections for medium voltage electron microscopy 43
Microneme, of *Theileria parva* 873
Mite, *Tetranychus*, ultrahistology of oogenesis and vitellogenesis in 179
Mitochondria, and the mitochondrial cloud during oogenesis in the sea anemone 393
—, -ciliary rootlet association, in photoreceptors of a serpulid worm 951
Mitochondrial cloud, fine structure of, during oogenesis in the sea anemone, *Actinia* 393
Mollusc, apple snail, structure of female reproductive tract of, SEM study 107
—, cephalopod, *Sepiola*, ultrastructure of the lens of 941
—, nudibranch, utilisation of cnidarian nematocysts by 719
—, snail, intracisternal tubules and intramitochondrial filaments in cells of 405
—, whelk, *Buccinum*, chitin helicoids accompany protein helicoids in the periostracum of 565
Molt, in lobster, exoskeletal-epidermal structure during 93
—, larval, lenticles: innervated secretory structures that are expressed at every other 251
Müller cells, of embryonic chick retina 843
Muscle, comparative stereology of the lizard and frog myocardium 173
—, cultured chick myoblasts 17
—, developing flight, of *Chironomus*, possible migration of imaginal myoblasts from adjacent nerve sheath into 767
—, flight, atypical 'fibrillar' in Strepsiptera 929
—, freeze-fracture of frog slow tonic fibers. Structure of surface and internal membranes 647
—, striated, of capillaries 31
—, -tendon cell attachment 411
Myoblasts, cultured, of chick 17
—, imaginal, possible migration of, from nerve sheath into developing flight muscle 767
Myocardium, comparative stereology of the lizard and frog 173
Myoneural, asynchrony, in flight muscle of Strepsiptera 929
—, junction, in frog slow tonic fibers 647
Mysosin, and tropomyosin, in cells undergoing ciliogenesis during regeneration of rat tracheal epithelium, immunolocalization of 337

N

Nematocysts, cnidarian, utilisation of by aeolid nudibranchs: maintenance and release in *Spurilla* 719
Nematode, *Trichinella*, a freeze-fracture study of the surface infective-stage larva of 819
Nerve sheath, possible migration of imaginal myoblasts from, into the developing flight muscle of *Chironomus* 767
Nervous system, a cryofixation study of presumptive hygroreceptors on the antennule of a terrestrial isopod 377
— —, central, in a nicotine-resistant insect 601
— —, HVEM of cilium-stereociliary complex of perioral sensory cells in *Hydra* 345
— —, perioral synaptic connections and their possible role in the feeding behaviour of *Hydra* 355
— —, —, lenticles of insect larvae 251
— —, sensory, surface coats of pore tubules and olfactory sensory dendrites of a silkmoth revealed by cationic markers 705
— — —, ultrastructural basis for high electrical resistance between receptor lymph and subcuticular spaces in silkmoth olfactory hairs 131
Nicotine-resistant insect, central nervous system features of 601
Nucleus, meiotic chromatin diminution in a holocephalan fish 203

O

Olfactory, sensory dendrites, surface coats of, revealed by cationic markers 705
Oogenesis, and vitellogenesis in the spider mite *Tetranychus* 179
*Orchestia*, in pre-molt, calcium pathway through a mineralizing epithelium in 269
Osmoregulation, design of an insect cuticle associated with 789

P

Papillary layer, of rat incisor enamel organ, freeze-fracture study of 635
Pericytes, plasmalemmal vesicular system in striated muscle capillaries and in 31
Peroxidase, diffusion, and freeze-fracture study of blood/CSF barrier in fetal rat choroid plexus 65
Peroxisomes, in the absorptive cells of normal, rachitic, and vitamin-D replete chick intestine 443
Phagocytosis, by digestive cells of *Chlorohydra*, a freeze-fracture study of 519
—, in disposal of foreign cells in two polychaete annelids 557
Phagosomes, in larval fat body of *Drosophila* 237
Photoreceptors, of a serpulid worm, novel organelle associations in 951
Pinocytosis 311 & 325

Pituitary cells, anterior, *in vitro* model of intercellular communication in 483
Placenta, yolk sac, pre-implantation, in shark 613
Plasmalemmal vesicular system, in striated muscle capillaries and in pericytes 31
Plasma membrane, identification and function of glycoproteins in 665
— —, isolation of, from boar sperm 455
— —, of fibroblasts of the rat 311 & 325
Polyamine biosynthesis, morphological changes in *Trypanosoma brucei rhodesiense* following inhibition of 731
Pore tubules, surface coats of, revealed by cationic markers 705
Protein helicoids, in the periostracum of a whelk 565
Protozoa, *Theileria parva*, interaction of sporozoites of, with bovine lymphocytes *in vitro* 873
—, *Trypanosoma brucei rhodesiense* 731

R

Receptor lymph, and subcuticular spaces in olfactory hairs 131
Renal corpuscle of a lizard, ultrastructure of 627
Reproductive system, boar sperm cytoplasmic droplets 455
— —, cholesteric organization of DNA in the stallion sperm head 535
— —, female, of apple snail, SEM study 107
— —, relationships between germinal cells and sustentacular cells in the testes of a palaemonid shrimp 115
— —, SEM study of hedgehog uteri 195
— —, the apparent absence of a cortical reaction after fertilization in a sea anemone 125
— —, ultrahistology of oogenesis and vitellogenesis in the spider mite, *Tetranychus* 179
— —, ultrastructure of pre-implantation shark yolk sac placenta 613
— —, ultrastructure of the accessory glands of Gene's organ in the cattle tick, *Boophilus* 589
Respiratory system, granulocyte-dependent injury of pulmonary endothelium 137
Retina, embryonic chick, isolation and characterization of flat cells, a subpopulation of the 843

S

*Sagitta*, chaetognath, the liquid crystalline nature of the cytoskeleton in epidermal cells of 469
Scorpion, *Paruroctonus*, ultrastructure of hemocytopoietic organs in 577
SEM, of female reproductive tract of the apple snail 107
Sensillum, olfactory, of silkmoth 131
Sensory cells, perioral, in *Hydra* 345
Shell formation, and calcium transport in the barnacle, *Chthamalus fragilis* 433
Skin, cultures, epithelial locomotion and differentiation on 499
Spermatozoa, stallion, cholesteric organization of DNA in 535
—, boar cytoplasmic droplets of: their ultrastructure, their numbers in the epididymis and their removal during isolation of plasma membrane 455
Sporozoites, of *Theileria parva*, interaction of, with bovine lymphocytes *in vitro*. I. Early events after invasion 873
Stereology, comparative, of the lizard and frog myocardium 173
Striated rootlets, ciliary 287
Subendothelial matrix, synthesis of, by bovine aortic endothelial cells in culture 677
Sustentacular cells, in testes of shrimp 115
Synapses, perioral, in *Hydra* 355

T

Tannic acid, basal lamina formation as revealed by 909
Testes, of palaemonid shrimp, germinal cells and sustentacular cells in 115
*Tetranychus*, spider mite, oogenesis and vitellogenesis in 179
Tick, *Boophilus*, ultrastructure of the accessory glands of Gene's organ in 589
Tissue culture, an *in vitro* model for studies of intercellular communication in cultured rat anterior pituitary cells 483
— —, cell-to-cell interactions in the developing lung 829
— —, effect of epidermal growth factor on cultured adult rat hepatocytes 157
— —, epithelial locomotion and differentiation in frog skin cultures 499
— —, granulocyte-dependent injury of pulmonary endothelium: a case of miscommunication? 137
— —, isolation and characterization of flat cells, a subpopulation of the embryonic chick retina 843
— —, of bovine pulmonary artery 1
— —, of cells of rat fibroblastoid line 311 & 325
— —, synthesis of subendothelial matrix by bovine aortic endothelial cells 677
— —, trypsin-induced aggregation of bovine pulmonary artery endothelial cells cultured on microcarriers 167
— —, type, location and role of glycosaminoglycans in cloned differentiated chick retinal pigmented epithelium 885
Tormogen cell membrane, and sensillum cuticle, tight contact between in silkmoth olfactory hairs 131
Tooth, rat incisor enamel organ, freeze-fracture study of the papillary layer of 635
Tropomyosin, and myosin, in cells undergoing ciliogenesis during regeneration of rat tracheal epithelium, immunolocalization of 337
*Trypanosoma brucei rhodesiense*, morphological changes in, following inhibition of polyamine biosynthesis *in vivo* 731
Tubules, intracisternal, in cells of a snail, *Limnaea* 405

V

Vitellogenesis, and oogenesis in the spider mite *Tetranychus* 179

X

X-ray microanalysis, of calcium pathway through a mineralizing epithelium in the crustacean *Orchestia* 269

——, ultrastructure and metal-containing inclusions in the hepatopancreas of a crayfish 805

Y

Yolk sac placenta, pre-implantation, in shark 613
